Volume 5 (1984)

Abarbanel, Henry D. I. *Instabilities in geophysical fluid flows*, 194.

Abbott, J. C., Butcher, S., Lee, R. and **Zak, K.** *The idempotent order in Boolean-like rings*, 14.

Abbott, James H. See **Kulshrestha, P. K.**

Abdelkader, Mostafa A. *A similarity solution for a quadratic one-dimensional porous-media equation*, 149. *A similarity solution for a cylindrically symmetric porous-media equation*, 220. *A nonlinearly, nonautonomously perturbed oscillatory differential equation*, 240. *A class of solutions for a nonlinear cylindrically symmetric porous-media equation*, 282. *A further class of solutions for a cylindrically symmetric porous-media equation*, 341.

Abdulhadi, Zayid, Bshouty, Daoud and **Hengartner, Walter.** *Univalent functions in $H\overline{H}(D)$*, 373.

Abian, Alexander. *An elementary derivation of the relativistic addition of velocities and $E = mc^2$*, 220. *The essentials of measure and integration*, 238. *An inner product and the corresponding orthonormalization in l^p-spaces*, 277. *A very elementary derivation of the relativistic addition of velocities and $E = mc^2$*, 321. *The natural right and the natural left inverses of rectangular matrices*, 394.

Abraham, D. B., Chayes, J. T. and **Chayes, L.** *Random surface correlation functions*, 425.

Abraham, Uri and **Shore, Richard A.** *Initial segments of the Turing degree of size $\aleph_1$*, 228.

Abramovich, Shoshana. See **Strelits, Shlomo**

Abramowich, John. *Some applications of recursion in analysis* (Preliminary report), 190.

Abrams, Gene D. *Infinite matrix types which determine Morita equivalence* (Preliminary report), 27.

Abu-Khusam, Hasar and **Yaqub, Adil.** *Periodic rings with commuting nilpotents*, 26. *Structure of certain periodic rings*, 368.

Abu-Muhanna, Yusuf and **Hallenbeck, David J.** *Support points of subordination families with univalent majorants*, 139.

Adams, Colin C. *Thrice-punctured spheres in hyperbolic 3-manifolds*, 183.

Adams, David R. *Some weighted estimates for potentials* (Preliminary report), 355.

Adams, Jeff and **Johnson, Joseph F.** *Stable packets of derived functor modules and liftings* (Preliminary report), 447.

Adams, Jeffrey. *Character formulas for derived functor modules* (Preliminary report), 371.

Addington, Susan L. *Representations of algebraic groups admitting holomorphic maps of symmetric domains*, 370.

Addis, David F. and **McAuley, Louis F.** *Sections and selections*, 98.

Adeniran, T. M. *Locally n-euclidean spaces in T_2-space*, 103.

Adomian, G. *Convergent series solution of nonlinear equations*, 68.

Aftabisadeh, Reza. *Existence and uniqueness theorems for fourth order boundary value problems* (Preliminary report), 56.

Agler, Jim. *Dilation on an annulus* (Preliminary report), 85.

Ahlbrandt, C. D. and **Hooker, J. W.** *Principal solutions of discrete linear systems and Riccati transformations*, 305.

Ahlbrandt, Gisela. *On totally categorical theories* (Preliminary report), 158.

Ahmad, Khalil. See **Jain, P. K.**

Ahmed, Shafique. *Inequalities for the zeros of ultraspherical polynomials*, 50. *Inequalities and numerical estimates for the zeros of ultraspherical polynomials*, 166.

Aisenman, Michael. *The intersection of Brownian paths as a case study of a renormalization group method*, 426.

Akahori, Takao. *The new approach to the local embedding theorem for $n \geq 4$* (Preliminary report), 465.

Akin, Kaan. *Representation theory of Schur algebras*, 353.

Aksoy, Asuman G. *Approximation schemes $(\mathcal{A})$, related $(\mathcal{A})$-compact operators and measure of non-$\mathcal{A}$-compactness* (Preliminary report), 75.

Al-Amiri, H. S. *On a characterization of the class of starlike univalent functions* (Preliminary report), 49.

Albert, John P. and **Fraser, Grant A.** *On the associativity of the tensor product of semilattices*, 367.

Albert, Martin K., Spencer, Domina Eberle and **Uma, Shama.** *Linear relations between covariant derivatives of tensors*, 311.

Albrecht, Felix. *On the controllability of certain nonlinear systems* (Preliminary report), 125.

Aldous, David. *Probability methods for random walks on finite groups*, 104.

Alexander, Herbert and **Wermer, John.** *Polynomial hulls with convex fibers* (Preliminary report), 274. *Polynomial hulls.* II (Preliminary report), 398.

Alexander, Kenneth. *Rates of growth and sample moduli for weighted empirical processes indexed by sets*, 413.

Alikakos, Nicholas. *A Liapunov function for monotone systems and some applications*, 359.

Aliprantis, C. D. and **Burkinshaw, O.** *Factoring compact and weakly compact operators through reflexive Banach lattices*, 80.

Almeida, Jorge. *Some order properties of the lattice of varieties of commutative semigroups*, 35.

Alon, N. and **Perles, M. A.** *Intersection of edges of a geometric graph by straight lines*, 307.

Al-Rashed, A. M. and **Zaheer, N.** *Stieltjes and Van Vleck polynomials and applications*, 301.

Al-Salam, Waleed A. *On a problem of J. Geronimus*, 166.

Alspach, Dale. *Projections onto translation invariant subspaces of $L_1(R^2)$*, 174.

Alt, H. W. and **Phillips, D.** *A free boundary problem for semilinear elliptic equations*, 357.

Altshuller, Dmitry A. *Existence, uniqueness and continuity for a class of constrained differential equations*, 356.

Alvarez, Teresa and **Onieva, Victor M.** *Generalized Fredholm operators*, 212.

Amick, C. J. and **Turner, R. E. L.** *A global theory of solitary waves in two-fluid systems*, 363.
